GARCÍA REQUEJO

TRADICIÓN E INNOVACIÓN EN PROYECTOS CONTRACT

TRADITION AND INNOVATION IN CONTRACT PROJECTS

En García Requejo aunamos tradición e innovación en nuestras soluciones de iluminación, con el fin de lograr un equilibrio entre estética y funcionalidad con diseños elegantes y de una gran calidad de acabado. Hablamos de tradición porque nuestras luminarias nacen del trabajo artesanal y, durante el proceso de creación, ponemos en práctica la utilización de técnicas milenarias como la fundición de metales o el arte del vidrio soplado. Encontramos innovación en la integración de la tecnología UV-C en el diseño de interiores por primera vez y en nuestro acabado para superficies Transfer.

At García Requejo, we combine tradition and innovation in our lighting solutions, to achieve a balance between aesthetics and functionality with elegant designs and high-quality finishing. We talk about tradition because our luminaires come from the artisanal and, during the creation process, we employ millenary techniques such as metal casting or the art of blown glass. We find innovation in the integration of UV-C technology into interior design for the first time and in our Transfer surface finish

DISEÑO DESIGN

Cada una de nuestras luminarias es el resultado de un proceso de diseño meticuloso y apasionado que refleja nuestro compromiso con la excelencia en el diseño y la funcionalidad. García Requejo ha sido galardonada con prestigiosos premios de diseño a nivel internacional, lo que nos inspira a seguir buscando nuevas formas de elevar el estándar en el diseño de iluminación.

Our luminaires are the result of a meticulous and passionate design process that reflects our commitment to excellence in design and functionality. García Requejo has been honoured with prestigious international design awards, inspiring us to continue seeking new ways to raise the standard in lighting design.

FABRICACIÓN MANUFACTURING

La calidad es nuestra máxima prioridad, por ello seleccionamos cuidadosamente los materiales más nobles para garantizar que cada pieza sea una inversión duradera que brinde años de belleza y funcionalidad. Entendemos que tu espacio es único, y por eso ofrecemos la posibilidad de personalizar cada lámpara para asegurarnos de que cada luminaria se ajusta perfectamente a tu visión.

Quality is our utmost priority, so we carefully select the finest materials to ensure that each piece is a lasting investment that provides years of beauty and functionality. We understand that your space is unique, which is why we offer the possibility to customize each lamp to ensure that each luminaire perfectly fits your vision.

REALIDAD AUMENTADA

AUGMENTED REALITY

La realidad aumentada es la tecnología capaz de añadir información a una imagen del mundo real mostrada a través de un dispositivo electrónico (móvil, tablet y ordenador). Añadir elementos adicionales e integrarlos en la imagen real permite transformar la realidad para ofrecer información extra al usuario. Nuestra Realidad Aumentada no requiere la descarga de ninguna aplicación específica, con solo escanear el QR, accederás a una URL donde explorar nuestros productos de iluminación en formato 3D de alta calidad desde la comodidad de cualquier dispositivo. Ello facilita visualizar los productos de forma más realista en los espacios a los que están destinados, permitiendo a diseñadores y arquitectos crear experiencias de realidad virtual para agilizar la toma de decisiones y garantizar que se conozca el resultado antes de la fabricación.

Augmented Reality is the technology capable of adding information to an image of the real world displayed through an electronic device (such as a mobile phone, tablet, or a computer). Adding additional elements and integrating them into the real-world image allows for transforming reality to provide extra information to the user. Our Augmented Reality does not require downloading any specific application. By simply scanning the QR code, you will access a URL where you can explore our high-quality 3D lighting products from the comfort of any device. This makes it easier to visualize the products in a more realistic way and place them in the you like the most, enabling designers and architects to create virtual reality experiences to streamline decision-making and ensure that the outcome is known before manufacturing.

¿CÓMO SE UTILIZA?

HOW TO USE IT?

OPCIÓN A

- 1 Escanea el código QR**
Scan the QR code

- 2 Visualiza el producto en Realidad Aumentada y colócalo en el espacio que más te guste**
View the product in Augmented Reality and place it in the space that you like the most

OPCIÓN B

- 1 Escanea el código QR del vídeo con los pasos a seguir para visualizar el producto en Realidad Aumentada**
Scan the video QR code with steps to view the product in Augmented Reality
